

**International Conjunction Assessment Workshop
June 26-28, 2019
At CNES HQ in Paris, France**

ANNOUNCEMENT

The 2019 edition of the International Conjunction Assessment Workshop will bring participants from Defense, Industry, Operators, and Space Agencies from around the world. The intent of this workshop is to serve as a forum for stakeholders in the CA mission to discuss operational, communications, and technical issues in this important and expanding field. This workshop will be in continuity with the previous International CA Workshop organized by CNES in Paris in 2015 & 2017 and with the Operators' Workshop organized by SpaceNav in Denver in 2016 & 2018.

The 2019 International Conjunction Assessment Workshop will take place on 26-28 JUNE 2019 in room "Espace", at CNES HQ in Paris. There will be no registration fee.

The objectives of this CA Workshop are:

- To bring together operational actors directly involved in the management of on-orbit collision risks
- To provide opportunities for networking and technical discussions
- To share practices and feedback on CA risk assessment
- To identify difficulties and possible remediations

The call for presentations will be sent out in December.

Thank you in advance for your consideration. Feel free to send any suggestions and to forward this message to any persons or organizations who may be interested.
