

Introduction of 2012 International Graduate Summer School in Aeronautics and Astronautics

The 2012 International Graduate Summer School in Aeronautics and Astronautics is organized by Beihang University, assisted by National Laboratory of Aeronautics Science and Technology (under construction).

Since its establishment, Beihang University has achieved the first place in more than 40 scientific researches, ranking the top in studies of cutting-edge technology among the domestic colleges and universities. In the assessment of the national key disciplines, it ranked first in terms of its advanced level discipline of Aeronautics and Astronautics Science and Technology.

In 2012, the summer school will take advantage of top domestic resources of research projects, and those well-known scholars and experts at home and abroad who are professional in academic area and rich in teaching experience. The participants will have the opportunity to visit several state key laboratories of Beihang University. They will have the opportunity to make exchanges with chief scientists leading crucial basic research project. Meanwhile, the school will also organize academic seminars for graduate participants from China and foreign countries to communicate and exchange ideas. After class, those students from different countries will be organized to visit places of interests in Beijing and take part in various entertainment activities in order to promote mutual understanding and friendship.

Beihang University warmly welcomes domestic and foreign graduate students to participate in this international summer school, to broaden your horizon and inspire innovative thinking.
