

“VII Dynamical Astronomy in Latin America Meeting”

ADeLA 2016@BOG

September 28 - 30, 2016

Universidad de los Andes, Colombia

ADeLA 2016 will bring together about 80 astronomers from Latin America, United States and Europe, to share their recent research and discoveries, to evaluate the state of-the-art, and to explore possible collaborations in the areas of Astrometry and Dynamical Astronomy.

The themes of the event include astrometric techniques using ground-based and satellite observations, trigonometric parallaxes, proper motions, reference systems, catalogs, time keeping, interferometric techniques in optical and radio, structure of the Milky Way and studies of the Solar System, among others.

Conference email: adela2016@uniandes.edu.co

Organized by the Astronomy Group,
Universidad de los Andes
